

A decorative header at the top of the page featuring various tech-related icons in shades of purple and pink, including a keyboard, a camera, a mouse, a smartphone, and a USB drive.

1

How does Github work?

It is an online software development platform used to store, monitor and work with software projects. It makes it easy to share code files and work on collaborative open source projects.

2

The history of Github

Github is born in Born in 2008 in an office in the San Francisco Valley (like so many other projects), GitHub today has more than 9 million registered users, more than 200 million visits per month and has been valued at more than 2 billion of dollars (which is why it's on Fortune's Unicorn List).
